Build your wheels here!

The Design:

Originally, the Starfish style design of the 6335 came from the first drawings of our GT35s – (Meant to work as a hub cap for the wheel). After machining the billets, we discovered how nice the shape looked standalone. Following on from this, we adapted our design to work as a 17 Inch Split Rim. We went on to debut this look on our '63 Beryl Green Beetle.

The Specs:

- 5×205 PCD
- 17" OZ 35 Bolt Pattern
- M7 Hardware
