OE34-17

Build your wheels here!

The Design:

Since creating the SM35, we've been asked by many to create a smaller version, to run on fatter tyre setups. We came up with the OE34 design (available in 16/17"). This design takes inspiration from the OE Smoothie Steels, combined with a 34 Bolt Holes on the edge, suitable for the widely available BBS Lips and Barrels.

The Specs:

- 5×205 PCD
- 17" BBS 34 Bolt Pattern
- M7 Hardware
