Car SOS Feature – March 2025

Back in 2024, we were lucky enough to receive a call, asking for our involvement in a really exciting build for a great cause. Inspired by the owner Paul's history in the RAF, the guys at Volksmagic added in lot of little details & references (including custom artwork on the shell), making it one super-unique build!

To aid with Paul's mobility getting in and out of his pride and joy, we supplied the team with a Deluxe Air Suspension Kit, finished in a one-off Gloss Grey (images below). This allows Paul drop his bug down for an easier climb inside, but provides enough lift to drive anywhere and everywhere.

Special Thanks to:

Volksmagic

The Car SOS Team
