

Every Single Bearing, Spacer & Seal for Every Aircooled VW

Guide | 10 Oct 2026 | Limebug Guide

This guide brings together wheel, drivetrain, engine, clutch and steering bearings alongside associated oil seals, O-rings, bearing spacers, thrust washers, circlips, lockrings and axle split pins for aircooled Volkswagen models through 1979. Where Limebug supplies the exact part or a complete service kit, the table links directly through the product SKU.

Complete Limebug service kits

Where one Limebug kit services several technical components, the individual bearing/seal rows remain separate in the index but point back to the same kit. This keeps the technical identification accurate without repeating the same product several times.

1950-65 Beetle / Ghia Link Pin Front Wheel Bearing Kit with Seal

1967-79 Bay Window Front Wheel Bearing with Seal

1971-79 Beetle / Ghia IRS Rear Wheel Bearing Kit with Seal

Type 1 Beetle & Karmann Ghia — front wheel bearings and seals

Type 1 / Karmann Ghia / Type 3 — rear wheel bearings and seals

Type 2 Split Screen — wheel bearings

Type 2 Bay Window 1968–79 — wheel, axle and differential bearings

Type 4 411 / 412 — bearings

Bearing spacers, thrust washers & retainers

These parts are included only where they directly locate, space, adjust or retain a bearing, hub or axle assembly. General vehicle fasteners remain in the separate torque/fastener index.

Engine, generator and clutch bearings / seals

Steering box bearings and seals

Gearbox, differential and driveline bearings / seals

Other service bearings

Using this index

The guide deliberately keeps dimensions out of a dedicated column until a dimension is confirmed. Known dimensions are shown alongside the VW/bearing reference so empty columns are not carried through the tables.
